THE UNIVERSITY OF ALABAMA IN HUNTSVILLE
Emergency Response Planning Workbook

Interdependencies

List all UAHuntsville business units required to carry out your critical functions

Process/Function	Steps to carry out	Business Unit/Dept.	Interdependency

Note: If a department or administrative level emergency response / continuity plan requires support by another department or organization, coordination with that organization is required, and the nature of that support must be clearly defined in the written plans of both entities.

An example would be where internet connection is required: for campus locations the interdependency would be with Computer and Network Services. External sites would require support from an internet service provider (vendor).
