## Angry Black Woman

Angry (adjective) feeling or showing strong annoyance, displeasure, or hostility. (Oxford Languages)

This stereotype perpetuates the myth that all Black women are hard to get along with, domineering, combative, and disagreeable. A serious expression on the face of any Black woman is often met with the question “Why are you mad?” The root of this stereotype can be found in the Sapphire caricature which dates back to the 1930’s. This caricature depicted the Black woman as bad-mannered, loud and always irritated. Despite the fact that there is no empirical evidence to support this stereotype this image continues to dominate society’s view of African American women.

## The Whore

Whore (noun) an offensive word for a woman who is thought to have a lot of sexual partners. (Cambridge Dictionary)

Perceived as promiscuous and easy, the Black woman is often viewed as hypersexual, immoral, and lusty. The Whore stereotype originated from the Jezebel stereotype which predates slavery and portrayed Black women as overly sexual and lascivious. Used as justification of the rape and abuse of Black women throughout history, this stereotype supports the fallacy that the Black woman is deserving of maltreatment.
